Riot table *Janne Kyttänen 2008*

Global warming has become an issue that most feel important to address, while some instead feel that destiny is in the hands of a higher being, and skeptics believe our planet has always been "breathing" and that the conditions we see are a natural occurrence. I have no political agenda, but I do believe that any issue or debate that brings to the table ideas that inspire people to consider the protection of all species and our planet, that encourages them to think twice about waste and how to save energy can only create positive side effects that are good for Earth.

The foundation of our company is based upon digitalizing products around us, and by doing so we help to reduce the human footprint on our environment by using less storage, transportation, material, labor etc. "Riot" is the first light in our collection which benefits not only from all of these waste-reduction initiatives, but is the first FOC product which only works with Megaman CFL energy saving bulbs. Other parts from the light also originate from recycled items, such as metal parts, switches and cables. "Riot" is sold as a limited edition until the global warming problem has been solved.

Type
Table light

Color
White / Brown

Shade material
Laser Sintered Polyamide
(Dirt protected)

Base / Pole material
Powder coated steel

Light source (MEGAMAN CFL 9W)
G9, 240 V

Cable (SPT1)
Black, 2 Meters

Electricity markings 240 V (Dimmer)

Weight
1 kg / 2.20 lbs

FOR INDOOR USE ONLY
